The campus will celebrate Black History Month with the following events during February:

• Thurs., Feb. 21: "You Have Struck a Rock." Noon. HSW 302. A film in which South African women Lillian Ngoyi, Helen Josephs and Dora Tamana tell their stories about the South African regime's attempt to extend the hated "pass" system in the 1950s and how women took the lead in mobilizing mass opposition to apartheid.

• Thurs., Feb. 28: SF premiere of "Woza Albert!" Noon. HSW 302. A satirical and humorous film by two Black South African former music hall performers based on the premise that Jesus Christ returns to the self-proclaimed "Christian" nation of South Africa.

• Photographic Displays: "The Black American Family." Two displays of family portraits in the lobbies of Millberry Union and the Medical Sciences building through the month of February. Anyone wishing to contribute their own photos to the exhibit should call x2571.

Black History Month is cosponsored at UCSF by the Office of Public Service Programs, the Ethnic Historical Celebration Committee, the Committee for Arts and Lectures and the Black Student's Health Alliance. All events are free and open to the public. Donations for the Ethiopian Relief Fund will be accepted at all programs.

On Friday, Feb. 15, escrow was closed on the purchase by UC of the old Fireman's Fund Building at California and Laurel Streets, and a UCSF transition team has moved in to expedite the campus management of the building in an orderly fashion.

The planning process for deciding which administrative and academic programs will occupy the building will be accomplished in accord with long-established University policies and procedures.

The following have moved into executive offices located at the Laurel Street entrance to handle the transition details:

• Brenda Patterson, executive planning coordinator, will be in charge of coordinating the occupancy of the building and the scheduling of the conference center in the initial stage. She can be reached at 346-3580.

• John Klose, building manager, is in charge of security, building maintenance, grounds, parking and transportation, telephone and mail. He also can be reached at 346-3580.

A shuttle service will be installed when the first UCSF occupants move in.

A new exhibit depicting UCSF's participation in two world wars has been installed in the Rare Book Room of the Library. The show reflects the large and diverse collection of World War I and II artifacts in the UCSF Archives, according to archivist Chris Creighton who is responsible for the exhibit.

Featured are a long panoramic 1918 photograph of UCSF nurses and doctors departing New York for Base Hospital 30 in Royat, France, a blue and gold flag flown by World War II Base Hospital workers in Mansfield, England, a copy of Dr. Meyer Schindler's historical account of both war efforts, World War I diaries, portable medical kits and surgical instruments, and several personal photographs.

WOMEN'S SELF-DEFENSE CLASSES

NEWS BRIEFS

John F. Mullan, MD, professor and chair of the Department of Neurosurgery at the University of Chicago, has been chosen as the third annual Edwin B. Boldrey Lecturer. Mullan will discuss "Progress and Problems in the Management of Selected Aneurysms and Fistulae" on Thursday, February 21, at 3:30 p.m. in Cole Hall.

Mullan has been on the faculty of the University of Chicago for some 30 years. Assistant secretary for the World Federation of Neurological Societies and vice president of the Society for Neurological Surgery, he is former president of the Central Neurological Society. He is a fellow of the Royal College of Surgeons and the American College of Surgeons.

Boldrey is UCSF emeritus professor of neurological surgery. Winner of the 1971 Elliot Royer Award, he joined the UCSF faculty in 1940 and is former vice chair of the Department of Neurological Surgery.

UCSF faculty are invited to submit proposals for grants in the following areas:

- AIDS research programs. Available from the UC-Systemwide AIDS Task Force, the grants will be effective July 1985 to June 1986 with no extensions. Although the Task Force does not set a maximum amount that may be requested for a research project, it does not anticipate making awards for more than $100,000. Deadline for proposals is Monday, April 1, in the AIDS Task Force Office, c/o The Office of Health Affairs, 764 University Hall, UC-Berkeley, CA 94720.
- Mexican studies, US-Mexican relations and border studies, Chicano studies, and physical, biological or health sciences related to Mexico. Projects should significantly involve faculty researchers at two or more UC campuses and should be interdisciplinary and/or involve scholars at Mexican institutions. Projects also should involve UC students in ways that will maximize the training potential of these activities. Funds up to $8,000 will be provided. Deadline for proposals is Friday, March 15, in the UC MEXUS Executive Committee Office, 2121-E Watkins Hall, UC-Riverside, CA 92521.

The Contracts and Grants Office reminds all investigators who plan to participate in a project proposed by another UC campus to submit the UCSF portion of the proposal to the Contracts and Grants Office one month prior to the agency deadline.

The newly established Microsurgical Laboratory at San Francisco General Hospital now is offering instruction in basic microsurgical techniques to all surgical specialists.

The one-week course consists of didactic teaching and supervised laboratory work covering microsurgery, microscope operation, instrumentation, hand-eye coordination, microdissection, body-hand positioning, suturing and vessel anastomoses. Teaching on more advanced procedures also is available, including nerve repairs and anastomoses of vas deferens and rat uteri.

The Microsurgical Laboratory is available on an hourly or daily basis for practice sessions. Fees are $750 basic course; $150 per day, includes basic instruction; $10 per hour, includes basic microscope use, supplies additional. CME credit is available.

Codirectors of the new laboratory are assistant professors Guy Trengove-Jones, MD, surgery; Ronald M. Barton, MD, plastic surgery; and Robert E. Markison, MD, chief of the Hand Surgery Service at SFGH. Staff research associate Cheryl Petray Knappen is course coordinator and instructor. For further information call Knappen at 821-8073 or 821-8814.

In honor of Children's Dental Health Month, the UCSF chapter of the Student American Dental Hygienists Association is giving a present every Friday in February to the first baby born that day in Moffitt/Long Hospitals. It consists of a baby dental health care kit, dental health literature and a T-shirt saying "I Love My Hygienist."

Faculty coordinator of the project is Norma Francisco, associate clinical professor and chair of the Division of Dental Hygiene and Preventive Dentistry. Student coordinators are Jennifer Law and Claire Choy, both to graduate this year.

Photographer Jane Marie Cleveland has an exhibit of her work at the Faculty/Alumni House Monday, March 4, to Friday, May 31 with an opening reception on Thursday, March 7, from 4:30 to 7 p.m.

A native Californian, Cleveland was the first place winner in the 1983 Juried Photographic Exhibition at Coos Art Museum, Oregon, and that same year placed in the SF Arts Festival and City Juried Exhibition at Nanny Goat Hill Gallery, SF.

At the request of the Board of Education, UCSF has submitted a revised proposal for a 75-year lease to provide student housing on the site of the Polytechnic High School. The new school district request calls for proposals to build on only three-quarters of the site. In its new proposal UCSF would renovate the existing main academic building instead of demolishing it, and build 100 units, surface parking of 160 spaces for tenants and their visitors and a recreational swimming facility. Other bids also have been submitted.

The Andrew W. Mellon Foundation has awarded a second $650,000 grant for another three years for a two-campus UC Clinical Epidemiology Program. The grant will be under the leadership of Stephen B. Hulley, MD, MPH, UCSF professor of epidemiology and medicine.

Other investigators include Chancellor Julius R. Krevans, MD; Philip R. Lee, MD, Institute for Health Policy Studies; Nicholas L. Petrakis, MD, epidemiology and international health; Virginia Ernster, PhD, epidemiology; Steven R. Cummings, MD, and David W. Feigel, MD, MPH, epidemiology and medicine. The UC-Berkeley investigator is epidemiologist Warren Winkelstein, Jr., MD, MPH.

Established in 1982, the UC Clinical Epidemiology Program promotes the use of epidemiological methods to explore the causes of chronic and acute diseases, to evaluate diagnostic and therapeutic procedures and to develop disease prevention measures and health policy.

It is conducted jointly by the Institute for Health Policy Studies and the Department of Epidemiology and International Health at UCSF and by the School of Public Health at UC-Berkeley.

One of the goals of the program is to train physicians for academic careers in clinical epidemiology. Two-year fellowships for individuals who have completed their clinical training provide a Masters in Public Health degree and experience in research and teaching.

The Annual Giving Office in the Office of Development now can be reached at the new telephone extension 2276. Annual Giving staff are Susan R. Jacobson, director; Diana Farley and Lisa Considine, associate directors; and Amy L. Liston and William C. Wright, administrative assistants. Remaining Office of Development staff still can be reached at telephone extension 5685.

In response to several requests, the Millberry Union Central Desk will be open one hour earlier—9 a.m.—on a trial basis through Friday, May 10. Let the people at Millberry know how you feel about their new hours by dropping a note in the suggestion box at Central Desk.

February is "Mystery Reader Month" at the Millberry Union Bookstore. You can get 20 percent off the price of any mystery book purchased during February.
